

# AMINE GLOBAL SERVICES

FILTRATION AND LIQUID/LIQUID COALESCER TECHNOLOGY  
AVAILABLE FOR RENTAL SKID MOUNTER FOR AMINE UNIT FILTRATION  
SOUR WATER STRIPPING UNIT

**FILTER**

**COALESCER**

**Ideal For Emergencies, Process Optimization, Turnarounds And Sour Water Stripping Unit**

Our filtration and liquid/liquid coalescing skids can be installed on site immediately in case of emergencies or used to reach longer-term product quality improvements

For more than 20 years AGS (Amines Global Services) has been solving complex contamination problems across the refining, petrochemical and oil and gas industries. By applying the advanced filtration and separation technologies directly to the problem we are able to help operators reducing the maintenance costs and minimize unscheduled shutdowns the AGS fully automated coalescer skids will efficiently breaks the stable emulsions, the removal of hydrocarbons, removal of suspended solids and the removal of foaming problems.

Both equipment are fully controlled and protected with a special PLC and do not require supervision by the operators.

For further and complete information on the characteristics and performance of our skids, you can consult our website: <https://www.amine-gas-treatment.com> (Filtration / Coalescence).
